The first part of the paper
 is devoted to a discussion of
 the general principles of
 the theory of the
 subject. It is shown that
 the theory is based on
 the assumption that the
 system is in a state of
 equilibrium. This is the
 first of the two main
 principles of the theory.

The second principle is that
 the system is in a state of
 equilibrium. This is the
 second of the two main
 principles of the theory.

My dear Mother
I have just received
your letter of the 10th

and was very glad to hear
from you. I am well and
hope this finds you the same.

I have not much news to write
at present. I am still in the
same place. I hope to hear
from you soon.
